

# Information & Communications Technology

The Education Transformation considers the effective implementation of Information and Communication Technology (ICT) one of the keys to academic improvement, lifelong learning and economic development. To that end, we have specialized in helping schools, school systems and community-based organizations provide ICT in the form of “Household Knowledge Management,” to “at risk” students and their families. We also provide comprehensive ICT consulting and access services for this segment, as well as micro-entrepreneurs and small businesses, working with our technology partners.

- Household Knowledge Management (computer access and literacy programs for clients of community-based organizations)
- Computers For Micro-Entrepreneurs (Computer access, literacy and business internet basics targeted at micro-entrepreneurs)
- Open Office™ productivity suite user training
- Practical and effective information and communications technology systems and networks for schools and small businesses
  - Needs Assessment
  - Design
  - Project Management
  - implementation
